

Assembling Parts to Create Architecture

**Have you ever considered
designing with parts or
modules?**

**Could it provide you with a
better, more efficient solution?**

Two pioneering architects come together to discuss their parts based projects, approaches and visions

Nonda Katsalidis: Director and founding member of Fender Katsalidis presents "Little Hero". A multi-residential project that is designed and assembled using factory constructed

Chris Barnett: director of Third Skin, presents his SmartSkin construction system, demonstrating that by designing 'parts', higher sustainable objectives can be achieved

Assembling parts to create architecture is more than prefabrication. It is a design philosophy that stems from details and crafts elements to create a whole. Architects have investigated the concept for over 60 years, but it is only in recent years that the methodology has had the potential to change our industry

Monday 30 August

6:00pm - 8:00pm

Level 3, 41 Exhibition Street

Ticket Type:

NM	Non-Member	\$84.00
M	Member	\$48.00
A+	A+ Member	\$44.00
RM	Retired Member	\$24.00
GM	Graduate Member	\$24.00
SNM	Student Non-Member	\$24.00
SM	SONA Member	\$12.00
